In the age of health care reform, hospitals are under increased pressure to reduce costs while improving the quality of care. The good news is that’s exactly what NAPA’s anesthesia management services are all about. Since anesthesiology drives the OR at the heart of every hospital, joining with NAPA can end up improving your organization’s overall ability to compete in this complex environment.

As the Affordable Care Act takes effect and reimbursement shifts from case volume to quality of care and patient satisfaction, enhancing the continuum of care is more critical than ever. NAPA’s proven model, with its unwavering commitment to quality patient care, makes us well-positioned to help your hospital meet evolving mandates and market pressures.

North American Partners in Anesthesia (NAPA) has the expertise and resources to help your hospital address:

- Creation and participation in Accountable Care, Surgical Home and Shared Savings initiatives
- Meeting CMS threshold benchmarks for SCIP results and other quality metrics
- Administering a data-driven approach to management of surgical patients
- Increased use of other surgical procedure areas within your hospital
- Surge in patient volume as 30 million more Americans enter the public insurance roles
